

## Manufacturing Services

### Product Design

At the centre of ALAR's design and engineering department is the latest Radan CAD/CAM system.

### CNC Punching

ALAR Engineering has invested heavily in the very latest fully automated high speed punching cell. This system is only one of a few fully automated systems in the UK.

### CNC Laser Cutting

As part of being able to offer the complete service parts can be laser cut.

### CNC Forming

ALAR Engineering has the very latest state of the art high speed Amada press brakes.

### Powder Coating

Substantial investment in powder coating technology enables ALAR to offer the complete powder coating service. A wide range of finishes are available for all base metals.
